## CBSE Test Paper 02

Chapter 14 Statistics

1. To represent 'the less than type' graphically, we plot the $\qquad$ on the x - axis. (1)
a. class marks
b. class size
c. lower limits
d. upper limits
2. $\frac{\text { Upperclasslimit }+ \text { Lowerclasslimit }}{2}=$ (1)
a. frequency
b. Class mark
c. None of these
d. class size
3. The mean of the first 10 prime numbers is (1)
a. 129
b. 1.29
c. 12.9
d. 11.9
4. The mean of the first 10 natural odd numbers is (1)
a. 9
b. 12
c. 11
d. 10
5. For the following distribution

| Class | $60-70$ | $70-80$ | $80-90$ | $90-100$ | $100-110$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 10 | 15 | 12 | 20 | 9 |

the sum of lower limits of the median class and modal class is (1)
a. 190
b. 20
c. 180
d. 170
6. If the mean and mode of a frequency distribution be 53.4 and 55.2 respectively, find the median. (1)
7. Find the mode of the following data: (1)
$15,8,26,25,24,15,18,20,24,15,19,15$
8. In the table given below, the times taken by 120 athletes to run a $100-\mathrm{m}$ hurdle race are given.

| Class | $13.8-14$ | $14-14.2$ | $14.2-14.4$ | $14.4-14.6$ | $14.6-14.8$ | $14.8-15$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 2 | 4 | 15 | 54 | 25 | 20 |

Find the number of athletes who completed the race in less than 14.6 seconds. (1)
9. What is the lower limit of the modal class of the following frequency distribution?

| Age(in years) | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of patients | 16 | 13 | 6 | 11 | 27 | 18 |

10. Find the class marks of classes 10-25 and 35-55. (1)
11. Convert the following cumulative distribution to a frequency distribution: (2)

| Height (in <br> cm) | less than <br> 140 | less than <br> 145 | less than <br> 150 | less than <br> 155 | less than <br> 160 | less than <br> 165 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of <br> students | 4 | 11 | 29 | 40 | 46 | 51 |

12. A class teacher has the following absentee record of 40 students of a class for the
whole term. Find the mean number of days a student was absent. (2)

| Number of days | $\mathbf{0 - 6}$ | $\mathbf{6 - 1 0}$ | $\mathbf{1 0 - 1 4}$ | $\mathbf{1 4 - 2 0}$ | $\mathbf{2 0 - 2 8}$ | $\mathbf{2 8 - 3 8}$ | $\mathbf{3 8 - 4 0}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of students | 11 | 10 | 7 | 4 | 4 | 3 | 1 |

13. Candidates of four schools appear in a mathematics test. The data were as follow:

| Schools | No. of Candidates | Average Score |
| :---: | :---: | :---: |
| I | 60 | 75 |
| II | 48 | 80 |
| III | Not available | 55 |
| IV | 40 | 50 |

If the average score of the candidates of all the four schools is 66, find the number of candidates that appeared from school III. (2)
14.

| Marks | Number of students |
| :---: | :---: |
| 0 and above | 80 |
| 10 and above | 77 |
| 20 and above | 72 |
| 30 and above | 65 |
| 40 and above | 55 |
| 50 and above | 43 |
| 60 and above | 28 |
| 70 and above | 16 |
| 80 and above | 10 |
| 90 and above | 8 |
| 100 and above | 0 |

Write the proper data (marks) and frequency (Number of students). (3)
15. During a medical check-up, the number of heartbeats per minute of 30 patients were recorded and summarised as follows:

| Number of heartbeats per <br> minute | $65-$ <br> 68 | $68-$ <br> 71 | $71-$ <br> 74 | $74-$ <br> 77 | $77-$ <br> 80 | $80-$ <br> 83 | $83-$ <br> 86 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of patients | 2 | 4 | 3 | 8 | 7 | 4 | 2 |

Find the mean of heartbeats per minute for these patients, choosing a suitable method. (3)
16. The following table gives the distribution of total household expenditure (in rupees) of manual workers in a city.

| Expenditure | $100-$ <br> 150 | $150-$ <br> 200 | $200-$ <br> 250 | $250-$ <br> 300 | $300-$ <br> 350 | $350-$ <br> 400 | $400-$ <br> 450 | $450-$ <br> 500 |
| :--- | :--- | :--- | :--- | :---: | :---: | :---: | :---: | :---: |
| Frequency | 24 | 40 | 33 | 28 | 30 | 22 | 16 | 7 |

Find the average expenditure (in Rs.) per household. (3)
17. The percentage of various categories of workers in a state is given in the following table. Present the information in the form of a pie chart (3)

| Categories of workers | $\%$ |
| :---: | :---: |
| Cultivators | 40.3 |
| Agriculture laboure | 25 |
| Industrial workers | 12.5 |
| Commercial workers | 9.7 |
| Others | 12.5 |
| Total | 100.00 |

18. Draw 'more than' ogive for the following distribution. Find the median from the
curve: (4)

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| No. of students | 10 | 18 | 40 | 20 | 12 |

19. Find the mode, median and mean for the following data: (4)

| Marks Obtained | $25-35$ | $35-45$ | $45-55$ | $55-65$ | $65-75$ | $75-85$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of students | 7 | 31 | 33 | 17 | 11 | 1 |

20. The median of the following data is 525 . Find the values of $x$ and $y$ if the total frequency is 100. (4)

| Class <br> Interval | $\begin{gathered} 0- \\ 100 \end{gathered}$ | $\begin{aligned} & 100- \\ & 200 \end{aligned}$ | $\begin{gathered} 200- \\ 300 \end{gathered}$ | $\begin{gathered} 300- \\ 400 \end{gathered}$ | $\begin{aligned} & 400- \\ & 500 \end{aligned}$ | $\begin{aligned} & 500- \\ & 600 \end{aligned}$ | $\begin{aligned} & 600- \\ & 700 \end{aligned}$ | $\begin{aligned} & 700- \\ & 800 \end{aligned}$ | $\begin{gathered} 800- \\ 900 \end{gathered}$ | $\begin{aligned} & 900- \\ & 1000 \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 2 | 5 | x | 12 | 17 | 20 | y | 9 | 7 | 4 |

## CBSE Test Paper 02

## Chapter 14 Statistics

## Solution

1. d. upper limits

Explanation: To represent 'the less than type' graphically, we plot the upper limits on the x -axis.
e.g marks obtained by students are represented in grouped data as (0-10), (1020), (20-30), (30-40) $\qquad$
only upper limits such as $10,20,30,40$ $\qquad$ are taken for the x-axis
2.
b. class mark

Explanation: In each class interval of grouped data, there are two limits or boundaries (upper limit and lower limit) while the mid-value is equal to
Upper class limit+Lower class limit
2
These mid-values are also known as Classmark.
3. c. 12.9

Explanation: The first 10 prime numbers are 2, 3, 5, 7, 11, 13, 17, 19, 23, 29
$\therefore$ Mean $=\frac{\text { Sum of first } 10 \text { prime numbers }}{10}$
$=\frac{2+3+5+7+11+13+17+19+23+29}{10}$
$=\frac{129}{10}$
$=12.9$
4. d. 10

Explanation: The first 10 natural odd numbers are 1, 3, 5, 7, 9, 11, 13, 15, 17, 19
$\therefore$ Mean $=\frac{\text { Sum of first } 10 \text { natural odd numbers }}{10}$
$=\frac{1+3+5+7+9+11+13+15+17+19}{10}$
$=\frac{100}{10}$
$=10$
5. d. 170

## Explanation:

| Class | $60-70$ | $70-80$ | $80-90$ | $90-100$ | $100-110$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 10 | 15 | 12 | 20 | 9 |

| Cumulative Frequency | 10 | 25 | 37 | 57 | 66 |
| :--- | :--- | :--- | :--- | :--- | :--- |

Here $\mathrm{N}=66$
$\Rightarrow \frac{\mathrm{N}}{2}=33 \therefore$ The median class is $80-90$ and Modal class is $90-100$ Sum of lower limits of Median class and Modal class $=80+90=170$
6. Mean $=53.4$

Mode $=55.2$
Mode $=3$ Median - 2 Mean
Hence, Median $=\frac{\text { Mode }+2 \text { Mean }}{3}$
$=\frac{55.2+2(53.4)}{3}$
$=\frac{55.2+106.8}{3}$
$=\frac{162}{3}$
$=54$
7. Mode : It is the value which occurs maximum number of times.

Given data:
$15,8,26,25,24,15,18,20,24,15,19,15$

| Value (x) | 8 | 15 | 18 | 19 | 20 | 24 | 25 | 26 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency (f) | 1 | 4 | 1 | 1 | 1 | 2 | 1 | 1 |

$\therefore$ From above table,
Mode $=15$ because it occurs maximum number of times.
8. According to the question,

| Class | $13.8-14$ | $14-14.2$ | $14.2-14.4$ | $14.4-14.6$ | $14.6-14.8$ | $14.8-15$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 2 | 4 | 15 | 54 | 25 | 20 |

Number of athletes who completed the race in less than 14.6 seconds are
$=2+4+15+54=75$
Therefore, 75 athletes completed the race in less than 14.6 seconds.
9. The Class having maximum frequency is called as modal class.

From observing table,
Here, maximum frequency $=27$.
$\therefore$ The modal class is 40-50.

The lower limit of the modal class is 40 .
10. Class - mark of class $10-25=\frac{10+25}{2}=\frac{35}{2}=17.5$

Class - mark of class 35-55 $=\frac{35+55}{2}=\frac{90}{2}=45$
11.

| Class | Frequency | Cumulative Frequency |
| :---: | :---: | :---: |
| $135-140$ | 4 | 4 |
| $140-145$ | $11-4=7$ | 11 |
| $145-150$ | $29-11=18$ | 29 |
| $150-155$ | $40-29=11$ | 40 |
| $155-160$ | $46-40=6$ | 46 |
| $160-165$ | $51-46=5$ | 51 |

12. 

| Number of days | Number of students $\left(\mathbf{f}_{\mathbf{i}}\right)$ | Class mark $\left(\mathbf{x}_{\mathbf{i}}\right)$ | $\mathbf{f}_{\mathbf{i}} \mathbf{u}_{\mathbf{i}}$ |
| :---: | :---: | :---: | :---: |
| $0-6$ | 11 | 3 | 33 |
| $6-10$ | 10 | 8 | 80 |
| $10-14$ | 7 | 12 | 84 |
| $14-20$ | 4 | 17 | 68 |
| $20-28$ | 4 | 24 | 96 |
| $28-38$ | 3 | 33 | 99 |
| $38-40$ | 1 | 39 | 39 |
| Total | $\sum f_{i}=40$ |  | $\sum f_{i} x_{i}=499$ |

Using the direct method,
$\bar{x}=\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{499}{40}=12.475$
Hence, the mean number of days a student was absent is 12.48.
13. Let the number of candidates from school III $=\mathrm{P}$

| Schools | No. of candidates $\mathbf{N}_{\mathbf{i}}$ | Average scores ( $\mathbf{x}_{\mathbf{i}}$ ) |
| :---: | :---: | :---: |
| I | 60 | 75 |

| II | 48 | 80 |
| :---: | :---: | :---: |
| III | P | 55 |
| IV | 40 | 50 |

Given
Average score for all schools $=66$
$\frac{N_{1} \overline{x_{1}}+N_{2} \overline{x_{2}}+N_{3} \overline{x_{3}}+N_{4} \overline{x_{4}}}{N_{1}+N_{2}+N_{3}+N_{4}}=66$
$\frac{4500+3840+55 p+2000}{60+48+p+40}=66$
$\Rightarrow 4500+3840+55 p+2000=66(60+48+p+40)$
$\Rightarrow 10340+55 p=66 p+9768$
$\Rightarrow 10340-9768=(66-55) p$
$\Rightarrow P=\frac{572}{11}$
$\Rightarrow P=52$
14. Table:

| Marks | Frequency |
| :---: | :---: |
| $0-10$ | 3 |
| $10-20$ | 5 |
| $20-30$ | 7 |
| $30-40$ | 10 |
| $40-50$ | 12 |
| $50-60$ | 15 |
| $60-70$ | 12 |
| $70-80$ | 6 |
| $80-90$ | 2 |
| $90-100$ | 8 |

15. Following table shows the given data \& assumed mean deviation method to calculate the mean :-

| Class |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Interval | Frequency $\left(\mathbf{f}_{\mathbf{i}}\right)$ | Mid value | Deviation $\mathrm{d}_{\mathrm{i}}=\mathrm{x}_{\mathrm{i}}-$ | $\left(f_{i} \times d_{i}\right)$ |

|  |  | $\mathbf{x}_{\mathbf{i}}$ | 75.5 |  |
| :---: | :---: | :---: | :---: | :---: |
| $65-68$ | 2 | 66.5 | -9 | -18 |
| $68-71$ | 4 | 69.5 | -6 | -24 |
| $71-74$ | 3 | 72.5 | -3 | -9 |
| $74-77$ | 8 | $75.5=\mathrm{A}$ | 0 | 0 |
| $77-80$ | 7 | 78.5 | 3 | 21 |
| $80-83$ | 4 | 81.5 | 6 | 24 |
| $83-86$ | 2 | 84.5 |  | $\Sigma\left(f_{i} d_{i}\right)=12$ |

Let, assumed mean ( A ) = 75.5.....(1)
Now, from table :-
$\sum f_{i}=30$ and $\sum f_{i} d_{i}=12$
Now,
mean $=A+\frac{\sum f_{i} d_{i}}{\sum f_{i}}$
$=75.5+\frac{12}{30}$.[ from (1) \& (2)]
$=75.5+0.4$
$=75.9$
Thus, the mean of heartbeats per minute for these patients is 75.9
16.

| Expenditure <br> (in Rs.) $\mathbf{x}_{\mathbf{i}}$ | Frequency $\mathbf{f}_{\mathbf{i}}$ | Mid- <br> value <br> $\mathbf{x}_{\mathbf{i}}$ | $\mathbf{d}_{\mathbf{i}}=\mathbf{x}_{\mathbf{i}}-$ <br> $\mathbf{A}=\mathbf{x}_{\mathbf{i}}-$ <br> $\mathbf{3 2 5}$ | $u_{i}=\frac{x-A}{h}$ <br> $=\frac{x_{i}-325}{50}$ | $\mathbf{f}_{\mathbf{i}} \mathbf{u}_{\mathbf{i}}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $100-150$ | 24 | 125 | -200 | -4 | -96 |
| $150-200$ | 40 | 175 | -150 | -3 | -120 |
| $200-250$ | 33 | 225 | -100 | -2 | -66 |
| $250-300$ | 28 | 275 | -50 | -1 | -28 |
| $300-350$ | 30 | 325 | 0 | 0 | 0 |

|  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $350-400$ | 22 | 375 | 50 | 1 | 22 |
| $400-450$ | 16 | 425 | 100 | 2 | 32 |
| $450-500$ | 7 | 475 | 150 | 3 | 21 |
|  | $N=\sum f_{i}=200$ |  |  |  | $\sum f_{i} u_{i}=-235$ |

Let the assumed mean be $\mathrm{A}=325$.
$\mathrm{N}=200, \mathrm{~A}=325, \mathrm{~h}=50$, and $\Sigma f_{i} u_{i}=-235$
mean $=\bar{x}=A+h \frac{1}{N} \Sigma f_{i} u_{i}$
$\Rightarrow \quad \bar{x}=325+50 \times\left\{\frac{-235}{200}\right\}$
$\Rightarrow \quad \bar{x}=325-\frac{235}{4}=325-58.75=266.25$
17.

| Categories of workers | $\%$ | Measure of central angle |
| :---: | :---: | :---: |
| Cultivators | 40.3 | $\frac{40.3}{100} \times 360^{\circ}=145^{\circ}$ |
| Agricultural labour | 25 | $\frac{25}{100} \times 360^{\circ}=90^{\circ}$ |
| Industrial workers | 12.5 | $\frac{12.5}{100} \times 360^{\circ}=45^{\circ}$ |
| Commercial workers | 9.7 | $\frac{9.7}{100} \times 360^{\circ}=35^{\circ}$ |
| Others | 12.5 | $\frac{12.5}{100} \times 360^{\circ}=45^{\circ}$ |
| Total | 100 | $360^{\circ}$ |

18.

| More than | $\mathbf{C . F}$ |
| :---: | :---: |
| 0 | 100 |
| 10 | 90 |

| 20 | 72 |
| :--- | :--- |
| 30 | 32 |
| 40 | 12 |

Graph:
Scale:on $x-$ axis, $1 \mathrm{~cm}=10 \mathrm{~cm}$.

From graph,
Median $=\frac{N}{2}$
$\frac{N}{2}=\frac{100}{2}=50$
Therefore, Median $=25$
19. Table:

| Class | Frequency | Mid value $\mathbf{x}_{\mathbf{i}}$ | $\mathbf{f}_{\mathbf{i}} \mathbf{x}_{\mathbf{i}}$ | Cumulative frequency |
| :---: | :---: | :---: | :---: | :---: |
| $25-35$ | 7 | 30 | 210 | 7 |
|  |  |  |  |  |

| $35-45$ | 31 | 40 | 1240 | 38 |
| :---: | :---: | :---: | :---: | :---: |
| $45-55$ | 33 | 50 | 1650 | 71 |
| $55-65$ | 17 | 60 | 1020 | 88 |
| $65-75$ | 11 | 70 | 770 | 99 |
| $75-85$ | 1 | 80 | 80 | 100 |
|  | $\mathrm{~N}=100$ |  | $\sum f_{i} x_{i}=4970$ |  |

i. Mean
$\frac{\sum f_{i} x_{i}}{\sum f_{i}}=\frac{4970}{100}=49.70$
ii. $\mathrm{N}=100, \frac{\mathrm{~N}}{2}=50$

Median Class is 45-55
$l=45, h=10, N=100, c=38, f=33$
$\therefore$ Median $=l+h\left(\frac{\frac{N}{2}-c}{f}\right)$
$=45+\left\{10 \times \frac{50-38}{33}\right\}$
$=45+3.64=48.64$
iii. we know that, Mode $=3 \times$ median $-2 \times$ mean
$=3 \times 48.64-2 \times 49.70$
$=145.92-99.4=46.52$
20.

| Class Interval | Frequency | Cumulative frequency |
| :---: | :---: | :---: |
| $0-100$ | 2 | 2 |
| $100-200$ | 5 | 7 |
| $200-300$ | x | $7+\mathrm{x}$ |
| $300-400$ | 12 | $19+\mathrm{x}$ |
| $400-500$ | 17 | $36+\mathrm{x}$ |
| $500-600$ | 20 | $56+\mathrm{x}$ |
| $600-700$ | $y$ | $56+\mathrm{x}+\mathrm{y}$ |
| $700-800$ | 9 | $65+\mathrm{x}+\mathrm{y}$ |

| $800-900$ | 7 | $72+\mathrm{x}+\mathrm{y}$ |
| :---: | :---: | :---: |
| $900-1000$ | 4 | $76+\mathrm{x}+\mathrm{y}$ |
|  | $\mathrm{N}=100$ |  |

Hence, $6+x+y=100$
$\Rightarrow x+y=100-76=24$
Given, Median = 525, which lies between class 500-600
$\Rightarrow$ Median class $=500-600$
Now, Median $=l+\frac{\frac{n}{2}-c . f}{f} \times h$
$\Rightarrow \quad 525=500+\left[\frac{\frac{100}{2}-(36+x)}{20}\right] \times 100$
$\Rightarrow 25=(50-36-\mathrm{x}) 5$
$\Rightarrow(14-\mathrm{x})=5$
$\Rightarrow \mathrm{x}=14-5=9$
Substituting the value of $x$ in equation (i),
$y=24-9=15$
Hence, $x=9$ and $y=1$
